CardFive

Card Design and Printing Software

WWW.NFIVE.COM

CardFive is a design and printing software for plastic cards.

Powerful but yet very **easy** to setup and use it has all the features needed to handle cards.

You can link the design to databases, **encode** magnetic cards, process **SmartCards**, create effects and manage **overlay**, hologram or scratch ribbon.

With its fully **integrated environment** it is very easy to design a card linked to a database.

The Easy Database feature allows you to use it as a simple **data entry** and print software.

It has powerful **imaging** features, place a logo **file**, read pictures from digital **photo** cameras or use real time imaging through **Video For Windows**. Save acquired images on the database.

Access **security** to card printing or database editing is provided via KeyFive and logins.

CardFive can print using **DCL** (Direct Command Language) to most popular card printers in the market and virtually any printer through **drivers**, including **page** printers.

Scalability is available through **editions** in order to meet user needs and budget. **Network** licenses available for corporate users.

All editions of **CardFive** are protected with **KeyFive** (reader and license card) which represents added security, it won't start without the license card inserted on reader.

CardFive packaging blister for Lite and Lite Plus editions.

CardFive packaging box for Premier and above editions.

CardFive Editions

	Lite The entry level edition, major design features, variables, all you need to print a card.	Lite Plus Adds direct connection to text files (CSV).	Premier Internal Database. Create, define and edit as many databases as needed. Database definable views, photo-on-a-field.	Professional External Databases (ODBC). Link a card to any record(s) any database. Logins, Video for Windows...	MultiHead Adds the concept of multiple cards being printed simultaneously.

CardFive Features Description

GENERAL	
Integrated environment	Everything is at your fingertips, easy, visible, and usable.
WYSIWYG Environment	No need for preview operations.
Database access	No import or export operations, ODBC database access.
6 Languages	English, Spanish, French, German, Portuguese and Italian.
5 Editions	CardFive comes in five different editions to meet.
Logins	Separate access rights for each user: design, edit data, print or setup.
Front & Back	Convenient design of both sides of the card.
32 Bits Application	Microsoft, Windows 95, 98 and Windows NT.
IMAGING	
Twain	Scanner, digital camera or any twain device to acquire photos.
Video For Windows	Real time video on a card.
Image on a Field	No need for separate image files.
Image on PDF	Encode photos on PDF 417 two-dimensional barcode.
Image Tools	Comprehensive set of image retouch function.
Open from file	BMP, TIF, TGA, PCX, JPG.
DESIGN	
Text	Align, rotate, color text, and much more. Use of all Windows fonts.
Barcodes	Major types, rotate, align. Check digits, human readable.
Shapes	Lines, rectangles filled and unfilled, orthogonal lines, diagonal lines.
Special Effects	Security features, images on overlay. Exclude magstripe or chip.
Batch print	Pre-Print, revise, select, print overlay management.
ENCODING	
SmartCard Plug In	Any SmartCard application can be run at print time.
Magnetic encoding	ISO Track 1, 2 and 3 directly or via Windows driver. Custom encoding.
PRINTING	
DCL's	Direct Command Language, maximum speed and error control.
MultiHead Printers	Mass production. Allows multiple cards to be printed simultaneously.
Print via Driver	Print via driver. Page printers.
Auto Print	Automatically print cards by adding records.
SmartDownload	Reduces graphic data send to the printer, improves speed.
DATABASE	
Internal database	Create your own database without a need for an external application.
Database query	Select the desired record set using queries.
Find function	Locate specific records.
ODBC	Maximum Connectivity. Access, Paradox, FoxPro, Excel, Text, SQL.
Definable Views	Show / Hide fields from database.
Browse	Browse records view.
Database Report	Create, save and print a listing of your database, including photos.
